SARA Title III Reporting Booklet —Indiana Code 13-25-2— 2003

Affix Facility Address Label

ONLINE REPORTING—Option I

Facilities subject to the EPCRA/SARA Title III reporting requirements and notifications can download and/or submit the appropriate forms/reports *online* by visiting www.tier2.in.gov. This website, managed by Access Indiana has easy-to-follow instructions on how to download information and accurately complete and submit reports online. This year, the IERC will pay for the user fees charged by Access Indiana. This means that this year the *online* reporting option is *free*. The following downloads, reports and/or notifications will be available at this website:

	TYPE OF REPORT/NOTIFICATION	REPORTING DEADLINE
1.	302 Notification—Emergency Planning Notification (Extremely Hazardous Substances—EHSs)	Within 60 days
2.	311 Reporting—List of Reportable Chemicals or Material Safety Data Sheet	Within 90 days
3.	312 Reporting—Hazardous Chemical Inventory Form (Tier II)	March 1 annually
4.	Facility Information Sheet—updates	Anytima
5.	Facility Reporting History—for viewing	Anytime
6.	HC-500 Form/Instructions—download	February annually

REPORTING BY MAIL—Option II

Enclosed are the instructions and required notification/reporting forms for EPCRA/SARA Title III reporting. Facilities may download the SARA Title III Reporting Booklet and/or the appropriate reporting forms (302, 311 & 312) at www.in.gov/idem/land/crtk. The booklet is also available to facilities upon request. The booklet details the main purposes for reporting, as well as instructions, requirements, EHS chemical information and LEPC contact information. To request a copy of the booklet and/or receive instructions regarding SARA Title III reporting, use/contact any of the following:

GENERAL INFORMATION

PURPOSE

The Emergency Planning and Community Right-to-Know Act (EPCRA), also known as the Superfund Amendment and Reauthorization Act (SARA) Title III, has two main purposes:

- 1. To encourage and support emergency planning for responding to chemical accidents
- 2. To provide local governments and the public with information about possible chemical hazards in their communities

MECHANISM

This law only works efficiently and effectively if all parties—the public, industries, local and state governments—actively collaborate, plan, and participate in EPCRA implementation and enforcement. At the state level, the law (Indiana Code 13-25-2) provides for the establishment of a State Emergency Response Commission (SERC). The SERC, known as the Indiana Emergency Response Commission (IERC) in the state of Indiana, is a 13-member commission whose members are appointed by the governor. The commission consists of professionals from state and local governments, private businesses and industries, and the general public. The main functions of the SERC are to maintain SARA Title III records and to manage the Local Emergency Planning Committees (LEPCs).

LEPC members are appointed by the SERC. Indiana has 92 LEPCs, and these committees consist of professionals from state, local, private, and public organizations. The functions of the LEPCs are to develop and manage the emergency response plans dealing with accidental chemical releases from facilities, and to distribute information to the general public.

REPORTING REQUIREMENTS AND NOTIFICATIONS

The presence of an extremely hazardous substance (EHS) at a facility in a quantity above the threshold planning quantity (TPQ) or 500 lbs., whichever is less, mandates that the facility notify the SERC, appropriate LEPC and the local fire department. The current EHS list contains approximately 362 substances. Environmental Response, Compensation and Liability Act (CERCLA) hazardous chemicals not listed but present at a facility in quantities greater or equal 10,000 pounds, are also subject to SERC, LEPC, and local fire department notification.

Facilities can readily determine whether or not a chemical manufactured, processed, stored, or accidentally released on site is subject to notification by consulting the "List of Lists." This is a consolidated list of chemicals subject to reporting under a variety of environmental rules, including EPCRA.

Facilities subject to the notification of reportable chemicals and substances accomplish this requirement by submitting any or all of 4 reports to the SERC, LEPC, and local fire departments. These reports are generically called 302, 304, 311, and 312, and are named after the section numbers of EPCRA to which they correspond. The notification requirements of these sections/reports are as follows:

- 1. 302—A facility is subject to notification requirements if an EHS is present at the facility in a quantity greater than or equal to either the established TPQ. The owner or operator of a facility shall notify the SERC and appropriate LEPC that the facility is subject to notification requirements. Notification must be within 60 days after acquisition of an EHS.
- 2. 304—The owner or operator of a facility shall immediately notify the SERC and appropriate LEPC about the accidental release of a hazardous substance (including an EHS) in excess of the reportable quantity (RQ) and shall provide a written report regarding actions taken and any injuries. The immediate notification shall be done by telephone or radio, or in person. The SERC and LEPC will in turn make the accidental release information available to the public.
- 3. 311—The owner or operator of any facility which is required to prepare or have available Material Safety Data Sheets (MSDSs) for hazardous chemicals under the Occupational Safety and Health Act (OSHA) shall submit MSDSs for, or a list of, hazardous chemicals on site (greater than or equal to the minimum threshold level) to the SERC, appropriate LEPC, and local fire department.
- 4. 312—The owner or operator of any facility which is required to prepare or have available MSDSs for hazardous chemicals under OSHA shall prepare an emergency and hazardous chemical inventory form (Tier II) and submit this to the SERC, appropriate LEPC, and local fire department. This form details the locations and amounts of chemicals on site.

As well as the Tier II submissions, owners or operators also may provide or be requested by the state of Indiana to provide the following:

- **a. Facility Information Sheet**—This is intended to update the mailing information and/or a facility's status on the reporting requirements. All facilities, including those required to comply with SARA Title III for the first time, must use this form to provide new or changed information outlined on the form. Additionally, facilities no longer required to comply with SARA Title III may use this form to notify the SERC and appropriate LEPC of this status change.
- **Site Map**—This details the location of all the reportable substances present at a facility. An $8\frac{1}{2}$ x 11-inch (standard size) site map is preferable.

In addition to the federally required notifications outlined above, owners or operators are required to file the Hazardous Chemical Inventory Fee Return (**HC-500**). The HC-500 form and instructions will be mailed separately to facilities by the Indiana Department of Revenue on or by the *first week of February of each year*. The funds generated from the HC-500 are allocated by the SERC to LEPCs to perform the following tasks:

- Prepare and update comprehensive county emergency response plans
- Establish and implement procedures for processing information requests by the public concerning hazardous chemicals
- Provide training for emergency response planning, information management, and hazardous material incident response
- Purchase equipment for hazardous materials response teams, to include communication equipment for administrative use
- Pay a stipend to LEPC members

It is important to note that 90% of the hazardous chemical inventory fees collected are returned to the local community through public education and the implementation of safety measures concerning hazardous chemicals.

All responses and questions regarding the fees or the HC-500 must be directed to

Indiana Department of Revenue Environmental Tax 100 N. Senate Ave. Indianapolis, IN 46204-2253 (317) 615-2589

Completed HC-500 forms and the fees (make checks payable to the Indiana Department of Revenue) must be separately mailed to the above address. This will significantly reduce administrative delays, which invariably affect the submission deadline.

TRADE SECRETS

A facility may claim "trade secret," or nondisclosure of chemical identity information, but must substantiate the claim. To apply for trade secret exemptions, a facility must contact the U.S. Environmental Protection Agency (EPA) at (800) 424-9346. Trade secret information may be disclosed to health professionals for diagnostic, treatment, and prevention purposes. Citizens may challenge trade secret claims by petitioning EPA. The statutory laws and requirements on chemical trade secrets can be found in Section 322 of EPCRA.

REPORTING DEADLINES

As noted on page 2, "Reporting Requirements and Notifications," facilities required to comply with SARA Title III must be cognizant of the reporting dates and deadlines. These dates and deadlines and their related EPCRA sections are as follows:

- **Section 302 60-Day Deadline**—A facility must notify the SERC and appropriate LEPC within 60 days when it becomes a planning facility (i.e., when an EHS is present at the facility in a quantity greater than or equal to either the established TPQ).
- Section 304 Immediate Deadline—When an accidental release of a hazardous substance (including an EHS) in excess of the RQ occurs at a facility, the owner or operator of the facility must verbally notify the SERC, appropriate LEPC, and the National Response Center (NRC) immediately. A follow-up written report must be submitted to the SERC as soon as possible.
- **Section 311 90-Day Deadline**—A facility must submit either an updated list or the relevant MSDS of reportable chemicals to the SERC, appropriate LEPC and the local fire department within *90 days*.
- **Section 312 (Tier II) March 1 Deadline**—A facility must submit an emergency and hazardous chemical inventory form (Tier II) to the SERC, appropriate LEPC, and local fire department by *March 1 of each year*.

ASSISTANCE

- 1. Environmental Protection Agency's (EPA) SARA Title III Hotline—This hotline will put you in touch with trained personnel who will assist in determining a facility's obligations under SARA Title III. Additionally, EPA offers other resources like the "List of Lists" (hard copy or disk) and a computerized Tier II software program to optimize facility reporting. For assistance, call their hotline at (800) 424-9346 and/or visit their website at www.epa.gov/ceppo.
- 2. Indiana Emergency Response Commission (IERC)—Trained professionals at the Indiana Department of Environmental Management will answer questions on compliance and will provide educational materials and useful tools for filling out the required forms/reports. Copies of the "List of Lists," EPA's Tier II software program, and additional copies of the Tier II reporting booklet are available from IERC. You may acquire some of these useful tools by calling (317) 233-0066 and/or by visiting any of the following websites:
 - www.in.gov/ierc
 - www.in.gov/idem/lad
 - www.in.gov/sema/sara
- 3. Local Emergency Planning Committees (LEPCs)—The LEPC in your county will provide information to the public on accidental releases and the emergency response plan. A complete list of the LEPCs and their addresses and telephone numbers are enclosed in this booklet. For further information, you may call (317) 232-3830 or semail your query to swalke@sema.state.in.us.

INSTRUCTIONS & FORMS

302 REPORTING

Section 302 of SARA Title III outlines the requirements if an EHS is present at a facility in a quantity greater than or equal to either the established TPQ. The presence of EHSs in such quantities designates a facility as a planning facility. **The facility must, therefore, submit written notification within 60 days of storing an EHS to**

- Indiana Emergency Response Commission 100 N. Senate Ave.
 P. O. Box 6015
 Indianapolis, IN 46206-6015
- The LEPC in the area where the facility is located (see the LEPC information on pages 23 through 25 of this booklet)

A 302 reporting form is enclosed in this booklet and may be used in place of a personalized report. Please note that by submitting a personalized report rather than the enclosed form, a facility must address all the items listed on the 302 form. To complete the form accurately, please follow these instructions:

1. Facility Information

- a. **Facility ID Number**—Provide the facility identification number for the facility. This number is printed on the mailing label. If the facility ID number is unknown, contact the SERC or appropriate LEPC for this ID number. If this is a new facility or a first-time filer, indicate this in the designated space.
- **Name of the Facility**—Enter the actual name of the facility, generally the name appearing on an exterior sign at the facility.
- c. Street Address—Provide the actual, complete street address of the facility, including number, name, and type of roadway. Providing only post office box numbers, railroads, routes, or highways is UNACCEPTABLE.
- d. **City**—Provide the name of the city where the facility is located. If the facility is remotely located, the name of the closest city, the city in which the primary responding fire department is located, or the township in which the facility is located must be designated.
- **county**—Provide the name of the county in which the facility is located. This must be consistent with the location of the city.
- **Zip**—Provide either the 5- or 9-digit zip code for the facility. If the facility is remotely located, provide the zip code of the post office that serves the area.
- **Telephone**—Provide the facility telephone number.
- **h. Email**—Provide email address for the facility.

2. Contact Information

- a. Contact Person—Enter the name of the designated contact person for the facility.
- **Address**—Provide the address of the contact person named above if this address is different from the facility address.
- **c. City**—Provide the name of the city where the contact person is located if different from the facility location.
- **d. County**—Provide the name of the county in which the contact person is located if different from the facility location. This must be consistent with the city location.
- **e. Zip**—Provide either the 5- or 9-digit zip code if different from the facility zip code.
- **Telephone**—Provide the telephone number for the contact person. This should be a 24-hour contact number.
- **g. Email**—Provide email address of the contact person.

3. EHS Storage Information

- **a. EHS Name**—Provide the common name or trade name of the substance or mixture.
- **Storage Quantity**—Provide the maximum quantity stored at the facility at any time during the year.
- **c. Date of Introduction**—Enter the date the EHS was first brought on site. This is the date the facility became a planning facility.
- **Reporting**—Provide each calender year this facility filed notification with the SERC and appropriate LEPC.
- **4. Certification**—Please provide name of the facility official filing out this form, their professional title and signature, and the date of completion of the form.

304 REPORTING

Section 304 of SARA Title III details the requirements for a facility's reporting of accidental releases of hazardous substances which will migrate off site. The release of any CERCLA hazardous substance or any EHS in excess of the established RQ for the substance **must be reported immediately.**

Two methods of reporting are necessary to comply with Section 304 of SARA Title III:

- 1. **Verbal Report**—Upon the accidental release of a hazardous substance, a facility shall immediately notify appropriate LEPC, the SERC, and the NRC by telephone or radio, or in person. The addresses and telephone numbers are as follows:
 - a. The Community Emergency Coordinator of the LEPC in the area where the release occurred (see the LEPC information on pages 23 through 25 of this booklet)
 - b. The Indiana Emergency Response Commission (IERC) (888) 233-7745 (toll free in-state)(317) 233-7745 (local or out-of-state)
 - c. The National Response Center (NRC) (800) 424-8802
- **2. Written Report**—A follow-up written report must be submitted to the SERC/IERC. This report must be submitted as soon as possible after the release occurs, so long as it does not interfere with emergency efforts. Please submit this report on company letterhead, signed by a designated company official. The report must contain the following information:
 - **a.** The chemical identity or name of substance released
 - **b.** Whether or not the substance released is on the Section 302 EHS list
 - **c.** An estimate of quantity released
 - **d.** The duration of release
 - **e.** The medium into which release occurred
 - **f.** Any anticipated health risks and advice regarding medical attention necessary
 - **g.** The precautions set by the facility to deal with the release
 - h. The name and phone number of the facility-designated contact person
 - i. All actions being taken by the facility

In addition to the above written requirements, the facility is also required to submit updates as more information becomes available.

A copy of the list of CERCLA hazardous chemicals and their RQs can be requested by calling the SARA Title III hotline number on page 4 of this booklet.

311 REPORTING

Section 311 reporting is the submission of either a Material Safety Data Sheet (MSDS) or a list of reportable chemicals under Section 312 of SARA Title III (stored chemicals in quantities greater than or equal to the minimum threshold levels), grouped by hazard category. If at any time after the initial submission (i) a facility obtains a new unreported substance, (ii) a hazardous chemical present at a facility meets or exceeds its threshold level for the first time, or (iii) significant new information concerning the hazards of a chemical stored by a facility is communicated via a revised MSDS, then either an updated list or the relevant MSDS must be sent to the SERC, appropriate LEPC, and local fire department. This supplemental information is due within 90 days of receiving the new chemical or information.

A 311 reporting form is enclosed in this booklet. To accurately complete this form, please follow these instructions:

- **Name of the Facility**—Enter the actual name of the facility, generally the name appearing on an exterior sign at the facility.
- **2. Facility ID Number**—Provide the facility identification number for the facility. This is the number printed on the mailing label. If the facility ID number is unknown, contact the SERC or appropriate LEPC for this ID number. If this is a new facility or a first-time filer, indicate this in the designated space.
- **3. Street Address**—Provide the actual, complete street address of the facility, including number, name, and type of roadway. Providing only post office box numbers, railroads, routes, or highways is UNACCEPTABLE.
- **City**—Provide the name of the city where the facility is located. If the facility is remotely located, the name of the closest city, the city in which the primary responding fire department is located, or the township in which the facility is located must be designated.
- **County**—Provide the name of the county in which the facility is located. This must be consistent with the location of the city.
- **Zip**—Provide either the 5- or 9-digit zip code for the facility. If the facility is remotely located, provide the zip code of the post office that serves the area.
- **7. Email**—Enter the facility's email address.
- **8. Chemical Name**—Provide the common name or trade name of each reportable substance or mixture stored at the facility.
- **9. Chemical Abstract Service (CAS)**—Provide the CAS number listed on the MSDS for each substance or mixture. The CAS number of some mixtures may not be specific or listed; therefore, a facility may do one of the following:
 - **a.** Provide the CAS number for the mixture or the CAS numbers for the individual chemical components of the mixture.
 - **b.** Provide the CAS number for the hazardous component which makes up the largest percent of the mixture or the CAS number of the most hazardous component of the mixture.
 - **c.** Leave the space blank if the substance/mixture is diesel or fuel oil.

- **10. Type of Chemical**—Indicate if each chemical is a Section 302 EHS, has a CERCLA RQ, or is otherwise regulated.
- 11. Physical and Health Hazards—A facility must have an MSDS for a hazardous substance designated as an OSHA hazardous substance. EPA has consolidated OSHA's hazard categories into health and physical health hazards. The following chart shows the relationship between the OSHA and EPA hazard categories. A facility should review the MSDS for each substance listed on the 311 reporting form. If the MSDS lists any of the OSHA hazards in the left column of this chart, find the corresponding EPA hazard on the right, and mark the appropriate box on this form.

OSHA HAZARD CATEGORIES	EPA HAZARD CAT	EGORIES
Flammable		
Combustion Liquid	Fire	sp
Pyrophoric Oxidizer		Iazar
Compressed Gas	Sudden Release	lth F
Explosive	of Pressure	Physical Health Hazards
Organic Peroxide		sical
Unstable—Reactive	Reactive	Phys
Water—Reactive

312 REPORTING

A facility required to prepare or have available MSDSs for hazardous chemicals/substances under OSHA must prepare and submit an emergency and hazardous chemical inventory form (Tier II). This is an annual reporting requirement due by March 1 of each year and must be sent to the SERC, appropriate LEPC, and local fire department. The types of chemicals and the requirements for reporting are (i) hazardous chemicals that are stored in excess of 10,000 pounds and (ii) EHSs stored in excess of 500 pounds or the TPQ, whichever is smaller.

Confidential and nonconfidential Tier II forms are enclosed in this booklet. To accurately complete the Tier II forms, please follow these instructions:

- **Pagination**—Indicate the number of pages in the submission. If the submission includes 3 Tier II forms, pagination should be 1 of 3; 2 of 3; and 3 of 3. Pagination should be for only Tier II forms and not any optional attachments.
- 2. **Reporting Period**—Enter the reporting year. This is the previous year during which the chemicals being reported were stored at the facility. If reporting for a period greater than one year, each reporting year must be accurately recorded. **If this space is left blank, the form will be returned.**
- **3. Previously Submitted Tier II Query**—Check this box if current facility information is that same as information submitted last years.
- 4. **Facility ID Number**—Provide the facility identification number for the facility. This is the number printed on the mailing label. If the facility ID number is unknown, contact the SERC or appropriate LEPC for this number. If this is a new facility or a first-time filer, indicate this in the designated space. **If this space is left blank, the form will be returned.**
- **Name of the Facility**—Enter the actual name of the facility, generally the name appearing on an exterior sign at the facility. If the facility does not have an "official" name, use a descriptive name. **If this space is left blank, the form will be returned.**
- 6. Street Address—Provide the complete street address of the facility, including number, name, and type of roadway. A descriptive address or express delivery address, consisting of the name of the street and the distance from and name of the next nearest cross-street, may be used. Providing only post office box numbers, railroads, routes, or highways is UNACCEPTABLE. If this space is left blank, the form will be returned.
- 7. City—Provide the name of the city in which the facility is located. If the facility is remotely located, the name of the closest city, the city in which the primary responding fire department is located, or the township in which the facility is located must be provided. If this space is left blank, the form will be returned.
- **8. County**—Provide the name of the county in which the facility is located. This must be consistent with the location of the city.
- **2. Zip**—Provide either the 5- or 9-digit zip code for the facility. If the facility is remotely located, provide the zip code of the post office that serves the area.
- **10. Email**—Enter the facility's email address.

- **Standard Industrial Classification (SIC) Code**—Provide the 4-digit SIC code for the facility. This is a federal identification code indicating the type of business conducted by the facility and can be found on the facility's tax forms. This code also can be found in the SIC code manual available at most libraries.
- **12. Dun & Bradstreet Number**—Enter the facility's Dun & Bradstreet number. The finance or accounting department can provide this number. Contact a local office of Dun & Bradstreet to obtain the facility's number if this number is unknown.
- **13. Owner/Operator Information**—The SERC/IERC considers the person filing this form to be the owner/operator of the facility.
- **14. Emergency Contact Information**—Provide the name, title, business or daytime phone numbers, and 24-hour contact number for both a primary and alternate emergency contact person. All persons named must be affiliated with the facility. Do not list the names and numbers of local emergency personnel. The emergency contact information is mandatory. **If this space is left blank, the form will be returned.**
- **15. Chemical Abstract Service (CAS)**—Provide the CAS number listed on the MSDS for each substance or mixture. The CAS number of some mixtures may not be specific or listed; therefore, a facility may do one of the following:
 - **a.** Provide the CAS number for the mixture or the CAS numbers for the individual chemical components of the mixture.
 - **b.** Provide the CAS number for the hazardous component which makes up the largest percent of the mixture or the CAS number of the most hazardous component of the mixture.
 - **c.** Leave the space blank if the substance/mixture is diesel or fuel oil.
- **16. Chemical Name**—Provide the common name or trade name of each substance or mixture stored at the facility. Mark the appropriate boxes corresponding to the physical and chemical properties of each named chemical. If the chemical is a designated EHS, mark the EHS box.
- 17. EHS Name—Provide the EHS name if the substance/mixture is an EHS or contains an EHS.

18. Physical and Health Hazards—A facility must have an MSDS for a substance designated as an OSHA hazardous substance. EPA has consolidated OSHA's hazard categories into health and physical health hazards. The following chart shows the relationship between the OSHA and EPA hazard categories. A facility should review the MSDS for each substance. If the MSDS lists any of the OSHA hazards in the left column of this chart, find the corresponding EPA hazard on the right, and mark the appropriate box on this form.

OSHA HAZARD CATEGORIES	EPA HAZARD CAT	EGORIES
Flammable Combustion Liquid Pyrophoric Oxidizer	Fire	Hazards
Compressed Gas Explosive	Sudden Release of Pressure	Physical Health Hazards
Organic Peroxide Unstable—Reactive Water—Reactive	Reactive	Physical
Highly Toxic Toxic Irritant Sensitizer Corrosive Other adverse effects with short-term exposure	Immediate (Acute)	Health Hazards
Carcinogen Other adverse effects with long-term exposure	Delayed (Chronic)	

19. Inventory Code—Enter the inventory code of each chemical/substance rather than the actual weight of the chemical. The inventory code represents a range based on the daily maximum weight of the chemical stored. The following is a list of inventory codes and the corresponding chemical weight ranges.

INVENTORY CODE	WEIGHT RANGES (POUNDS)
01	0–99
02	100–999
03	1,000–9,999
04	10,000–99,999
05	100,000–999,999
06	1,000,000–9,999,999
07	10,000,000-49,999,999
08	50,000,000–99,999,999
09	100,000,000-499,999,999
10	500,000,000–999,999,999
11	1 billion-greater than 1 billion

- a. If a facility does not (i) store any EHS in a quantity greater than or equal to either the established TPQ or 500 pounds, whichever is less, or (ii) have any hazardous chemical/substance with an inventory code larger than 03, *the facility is not subject to Tier II filing*.
- **b.** If liquids are being reported, quantities must be converted to pounds by using one of the following (the density or specific gravity of the chemical will be listed on its MSDS):
 - density * number of gallons = pounds
 - specific gravity * 8.3 * number of gallons = pounds
- c. If a hazardous substance was stored in excess of the minimum threshold level for even one day during the reporting year, the chemical/substance must be reported.

20. Container Type and Storage Conditions—Enter the correct codes for container type, pressure, and temperature of each hazardous chemical/substance listed. If storing a chemical in several different container types, enter the code for each type of container and each applicable storage condition. Storage condition is ambient if the container is not heated, cooled, pressurized, or under vacuum.

The following is a list of storage container types, temperature and pressure conditions, and their corresponding codes:

STORAGE CONTAINER TYPES	<u>Code</u>	TEMPERATURE AND PRESSURE CONDITIONS	CODE
Above-Ground Tank	A	Ambient Pressure	1
Below-Ground Tank	В	Elevated Pressure	2
Tank Inside Building	C	Decreased Pressure or Vacuum	3
Steel Drum	D	Ambient Temperature	4
Plastic or Non-Metal Drum	E	Elevated Temperature (heated)	5
Can	F	Decreased Temperature (cooled)	6
Carbouy	G	Cryogenic Conditions (super-cooled)	7
Silo	Н		
Fiber Drum	I		
Bag	J		
Box	K		
Cylinder	L		
Glass Bottles or Jugs	M		
Plastic Bottles or Jugs	N		
Tote Bin	O		
Tank Wagon	P		
Rail Car	Q		
Other	R		

- **21. Storage Location**—Enter a description of where the chemical is stored using the following guidance ("on site" and other such general descriptions are UNACCEPTABLE):
 - **a.** If the chemical is stored outside, enter the size of the container and its location relative to buildings and roads.
 - **b.** If the chemical is stored inside, provide the location relative to walls, doors, and other obvious structures inside the building.
 - c. If the chemical is stored in many locations throughout the building, enter "ubiquitous."
 - d. If a site plan is provided, enter "see site plan." However, the site plan must provide enough detail to locate easily the storage area of each chemical listed. The site plan must also include tank sizes, labeled streets, marked distances between structures, and any other information necessary to help emergency personnel quickly assess the site in the event of an emergency.
 - **e.** If the "see site plan" option is chosen, provide a site plan even if one was submitted the previous year.
 - **f.** If a detailed storage location is recorded on the Tier II form itself, submitting a site plan is optional.
 - g. If chemical location confidentiality is being claimed for proprietary or competitive reasons, a facility must submit Tier II form mark the *Confidential Location Information Sheet* in addition to nonconfidential Tier II form.

Do not submit the confidential location information sheet if you have disclosed storage location information on the nonconfidential Tier II form.

Include the confidential location information sheet only if you wish to have storage locations kept from public view.

When compiling the Tier II forms for submission, a facility must separate the non-confidential location sheet(s) from the Confidential Location Information Sheet(s). The SERC will, upon receipt, sort the information and placed the non-confidential Tier II form(s) in the public files while the confidential location information sheet(s) will be placed in a "not for public view" area. If a site plan is attached, it will be placed with the confidential information.

- **h. Optional Attachments**—Check all that apply.
- i. Certification Name and Official Title—Enter the name and title of the person authorized to certify the Tier II submission for the facility. If this space is left blank, the form will be returned.
- j. Certification Signature—Sign the form. This must be the original signature of the owner or authorized personnel. If this space is left blank, the form will be returned.
- k. **Certification Date of Signature**—Enter the date on which the Tier II form was signed. **If this space is left blank, the form will be returned.**

FACILITY INFORMATION SHEET

The SERC has developed a Facility Information Sheet to aid in the management of facility information pertinent to SARA Title III requirements. A facility should file this form in the spirit of helping the SERC maintain an up-to-date database on past and present reporting facilities in the state of Indiana. This form should be used if a facility is one or more of the following:

- A new facility that is subject to the requirements of SARA Title III for the first time
- An old facility that is now subject to the requirements of SARA Title III
- An old facility seeking to update previously submitted information
- An old facility that is no longer subject to SARA Title III requirements

A Facility Information Sheet is enclosed in this booklet. To accurately complete this form, please follow these instructions:

- **1. Date**—Enter the date on which this form is completed.
- **2. Facility ID Number**—Provide the facility identification number for the facility. This number is printed on the mailing label. If the facility ID number is unknown, contact the SERC or appropriate LEPC for this ID number. If this is a new facility or a first-time filer, indicate this or leave in the designated space blank.
- **Name of the Facility**—Enter the actual name of the facility, generally the name appearing on an exterior sign at the facility.
- **4. Street Address**—Provide the actual, complete street address of the facility, including number, name, and type of roadway. Providing only post office box numbers, railroads, routes, or highways is UNACCEPTABLE.
- **City**—Provide the name of the city where the facility is located. If the facility is remotely located, the name of the closest city, the city in which the primary responding fire department is located, or the township in which the facility is located must be designated.
- **County**—Provide the name of the county in which the facility is located. This must be consistent with the location of the city.
- **Zip**—Provide either the 5- or 9-digit zip code for the facility. If the facility is remotely located, provide the zip code of the post office that serves the area.
- **8. Email**—Provide email address of facility
- **9. SARA Title III Status**—Circle "NO" if the facility is not subject to SARA Title III requirements. Skip to question 4. Circle "YES" if the facility is subject to SARA Title III, and proceed with the questionnaire.
- 10. Contact Name—Enter the name of the designated contact person for the facility.
- **11. Telephone**—Enter the telephone number of contact person.

- **12. Address**—Provide the address of the contact person named above if different than the facility address.
- **13. City**—Provide the name of the city where the contact person is located if different than the facility location.
- **14. County**—Provide the name of the county in which the facility is located if different than the facility location. This must be consistent with the location of the city.
- **15. Zip**—Provide either the 5- or 9-digit zip code if different than the facility zip code.
- **16. Email**—Provide email address of contact person
- **17. Latitude/Longitude**—Provide the latitudinal and longitudinal coordinates at which the facility is located. This information may be obtained from the appropriate U.S. geological survey map.
- **18. Name/Telephone**—Enter the name and telephone number of the person filing this form if different than the contact person.
- 19. **Business Type**—Indicate the type of facility by circling the appropriate description on the form.
- 20. New Facility Name—Provide the previous name of the facility if name has changed.
- **21. New Owner Name**—Provide the previous name of the owner if there has been a change of ownership.
- **22. New Address**—Enter facility's old address if this has changed.
- **23. Address Change Reason**—Provide reason(s) for address change.
- **24. Fee Category**—Circle the appropriate fee category indicated on the form.
 - A—\$200 (Facility stores reportable substance(s) > 1,000,000 lbs anytime)
 - **B**—\$100 (Facility stores reportable substance(s) < 1,000,000 lbs anytime)
 - **C**—\$50 (Facilities with above ground storage tank(s) at any capacity anytime)
 - **E**—Exempt (Federal, state or municipal facilities)
- **25. Fee Exemption**—Check the appropriate reason for fee exemption.

A facility may submit the Facility Information Sheet along with the 311 or 312 (Tier II) reporting forms or separately to the IERC/SERC. The address and contact information of the SERC can be found on page 5 of this booklet.

Only the statutory or final RQs are shown. For more information, see 40 CFR Table 302.4.

NOTES

- a This chemical does not meet acute toxicity criteria. Its TPQ is set at 10,000 pounds.
- b This material is a reactive solid. The TPQ does not default to 10,000 pounds for nonpowder, nonmolten, nonsolution form.
- c The calculated TPQ changed after technical review as described in the technical support document.
- d The RQ is subject to change when the assessment of potential carcinogenicity and/or other toxicity is completed.
- e This is a statutory reportable quantity for purposes of notification under SARA Section 304(a)(2).
- f [Reserved]
- g This is a new chemical added that was not part of the original list of 402 substances.
- h The chemical has a revised TPQ based on new or reevaluated toxicity data.
- The TPQ is revised to its calculated value and does not change due to technical review as in proposed rule.
- k The TPQ was revised after proposal due to calculation error.
- The chemical was on the original list and does not meet toxicity criteria but because of its high production volume and recognized toxicity, it is considered a chemical of concern.

FREQUENTLY ASKED QUESTIONS

Question: What is the **facility identification number** (FID)?

Answer: The state of Indiana assigns each facility subject to SARA Title III requirements a one-

time unique number known as the FID. A facility must use this number for as long as it is subject to SARA Title III requirements. This number is printed on the label affixed to the front page of this reporting booklet. Facilities which have not yet been assigned an

FID should indicate "unknown" wherever the FID is required.

Question: When will the Hazardous Chemical Inventory Fee Return (**HC-500**) be mailed?

Answer: The HC-500 form and instructions will be mailed separately to facilities by the Indiana

Department of Revenue on or by the first week of February.

Question: What is the **reporting period** for the Emergency and Hazardous Chemical Inventory

form (Tier II) due by March 1 every year?

Answer: A facility's emergency and hazardous inventory for the previous year is the reporting

period of a Tier II report due by March 1 of each year unless otherwise indicated by the facility (e.g., a Tier II report due by March 1, 2000, is for the January 1 to December 31

filing period).

Question: Is there an **extension date** for Tier II file or any other SARA Title III requirements?

Answer: No however, facilities are encouraged to filing even if the March 1 deadline will not be

met.

Question: Should the **Facility Information Sheet** (FIS) always be submitted along with the Tier II

report?

Answer: No, this form should be used if a facility is one or more of the following:

A new facility that is subject to SARA Title III requirements for the first time

• An old facility that is now subject to SARA Title III requirements

• An old facility seeking to update previously submitted information

• An old facility that is no longer subject to SARA Title III requirements

Question: What is meant by the threshold planning quantity (**TPQ**) of a hazardous chemical?

Answer: Only extremely hazardous substances (EHSs) have TPQs. All other hazardous chemicals

have a threshold of 10,000 pounds under the SARA Title III requirements. See pages 27

through 38 for the list and TPQs of the established EHSs.

Question: Why do some substances have **two published TPQs:** a lower and a higher TPQ?

Answer: The higher TPQ is designated for the substance in solid form, while the lower TPQ is

designated for the substance in powder form (100 microns), in molten form or if reactive

under the National Fire Protection Association rating of 2, 3 or 4.

Question: Are there **exemptions to EPCRA Section 302?**

Answer: No, a facility is subject to notification requirements if an EHS is present in a quantity

greater than or equal to the established TPQ. The facility is therefore a planning facility.

Question: Are there **exemptions to EPCRA Section 304** reporting requirements?

Answer: Yes, the statute provides several exemptions from notification:

• A "federally permitted release" as defined under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980 Section 101(10)

- Releases which result in exposure only to persons solely within the facility boundaries
- Releases from a facility which produces, uses, or stores no hazardous chemicals
- "Continuous releases" as defined under CERCLA Section 103(e) except for initial reporting of the release and statistically significant releases
- Application of a pesticide, in accordance with its intended purpose, registered under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as defined under CERCLA Section 103(e)
- Emissions from engine exhaust of a motor vehicle, rolling stock, aircraft, or pipeline pumping station
- Normal application of fertilizer
- Release of source, byproduct, or special nuclear material from a nuclear incident at a facility subject to requirements of the Price-Anderson Act (i.e., a nuclear power plant)

Question: Are there exemptions under EPCRA Section Sections 311 and 312?

Answer: Yes, the statute provides several exemptions from reporting:

- Mining facilities
- Substances in or being stored incident to transportation
- Substances controlled by the Food and Drug Administration (FDA)
- Substances for personal household use

• Substance for research laboratories and hospital or other medical facility under the direct supervision of a technically qualified individual.

Question: Are retail **gasoline stations exempt** from filing Tier II reports?

Answer: Retail gasoline stations are exempt from filing Tier II reports only if the gasoline and

diesel fuel stored are less than 75,000 and 100,000 gallons respectively.

Question: How are **farms** with ten or fewer employees covered under EPCRA Sections 311 and

312 of Title III?

Answer: Since farms with ten or fewer employees are not covered by the Occupational Safety and

Health Administration (OSHA), they would not be covered under Sections 311 and 312.

Question: Would a **farm supplier or retail distributor be excluded** from Sections 311 and 312

reporting based on the agricultural exemptions?

Answer: Under Section 311(e)(5), retailers are exempted from reporting requirements for

fertilizers only. Therefore, substances sold as fertilizers would not need to be reported under Sections 311 and 312 by retail sellers. However, other agricultural chemicals, such as pesticides, would have to be reported under Sections 311 and 312 by retail sellers.

Question: How are the activities of "farm cooperatives" interpreted for reporting purposes?

Answer: Farm cooperatives would be subject to Sections 311 and 312 reporting requirements.

Question: How is an **off-site release determined to be subject to Section 304 notification**

requirements?

Answer: A release need not result in actual exposure to persons off-site in order to be subject to

release reporting requirements; potential exposure is sufficient. Any release into the environment above the reportable quantity may have the potential to result in exposure to

persons off-site and therefore should be reported under Section 304 notification.

Question: **How are chemical** mixtures reported?

Answer: Mixtures are reported by using either of these options:

• Calculating the quantity of the hazardous chemical components in each chemical

mixture

• Reporting the total quantity of each chemical mixture

Question: Are landfills covered under Title III of SARA since they are covered by the Resource

Conservation and Recovery Act (RCRA)?

Answer: Yes, landfills are subject to certain Title III requirements.

Question: If an EHS is not stored on-site but is produced in a process such as incineration, is it

exempt from both TPQ calculation and release reporting if the release is covered by a

Clean Air Act permit?

Answer: If the hazardous substance is produced on-site in a process such as incineration, it is

considered present at the facility and subject to Section 302 reporting requirements (starting May 17, 1987, and continuing up to the present date) provided, of course, that the amount on-site exceeds the TPQ at any one time. However, if the release is federally permitted under Section 101(10) of CERCLA, which includes permitted emissions into the air under the Clean Air Act, then the release need not be reported under Section 304

of Title III.
